

RoHS Policy

The Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment Regulations 2012 (SI 2012/3032) as amended (the RoHS Regulations) and the European Directive 2011/65/EU on the restriction of the use of certain hazardous substances in electrical and electronic equipment (the 'RoHS Directive')

This legislation restricts the use of certain specified hazardous substances including some heavy metals and flame retardants in listed categories of electrical and electronic equipment (EEE) and ban the placing on the market of new EEE containing more than an agreed level of restricted substances.

Products need to be compliance marked using the appropriate marking per jurisdiction requirements to demonstrate compliance.

Producers of EEE within the scope of the legislation are responsible for ensuring that their products meet the requirements.

Where customers buy raw material from Locate Supplies that is subsequently used in the production of Electrical and Electronic Equipment, Locate Supplies regularly contacts suppliers to confirm that where relevant, the % weight of the listed substances in the products supplied complies with the regulation requirements, or to advise if this is not the case:

- Lead (0.1%)
- Mercury (0.1%)
- Cadmium (0.01%)
- Hexavalent Chromium (0.1%)
- Polybrominated biphenyls (PBB) (0.1%)
- Polybrominated diphenyl ethers (PBDE) (0.1%)
- Bis (2-ethylhexyl) phthalate (DEHP) (0.1%)
- Butyl benzyl phthalate (BBP) (0.1%)
- Dibutyl phthalate (DBP) (0.1%)
- Diisobutyl phthalate (DIBP) (0.1%)

Locate Supplies documents the results and can provide data to relevant interested parties on request.

Any questions or queries should be sent to qualityso@twmetals.co.uk
